Intelligent Visitor Management System (IVMS)

Every visit — verified, seamless, secure. The AI-powered front-desk security layer for modern facilities.

2026 Edition · digiwareconnect.com

— OVERVIEW

The front desk is a security layer — treat it like one

IVMS replaces paper logbooks and unverified badges with layered, intelligent verification: pre-registration with QR passes, face-recognition check-in, watchlist screening, geo-fenced zone permissions and automatic host notifications — every visit an auditable digital record.

— CORE CAPABILITIES

CAPABILITY	WHAT IT DELIVERS
Face recognition check-in	Touchless identity verification in under 3 seconds
QR visitor passes	Pre-registered guests check in instantly from their phone
AI visitor verification	Watchlist screening, anomaly detection, risk flags in real time
Geo-fencing & zones	Zone-level permissions with alerts on violations
Appointments & meetings	Scheduling, host notifications, room coordination
Security monitoring	Live occupancy, evacuation lists, analytics dashboard

— ENTERPRISE INTEGRATIONS

- SAP
- Salesforce
- Zoho
- CCTV / NVR
- Access Control
- Active Directory

Proven in the field: deployed across a 6-campus healthcare network — sub-3-second check-ins, 100% digital audit trail, one security dashboard for the entire estate.

— BUILT FOR

ENVIRONMENT	TYPICAL USE
Enterprises	HQ & branch lobbies, contractor management, compliance audit trails
Government facilities	Watchlist screening, zone permissions, incident-ready records
Hospitals	Ward-level geo-fencing, patient-visitor policies, after-hours control
Educational campuses	Guardian verification, event visitor flows, campus-wide view
Residential communities	Resident approvals, delivery management, gate automation

— DEPLOYMENT & SECURITY

- **Deployment options** — cloud, on-premise or hybrid; kiosk, tablet and desk configurations.
- **Privacy by design** — consent capture, configurable retention, role-based access.
- **Resilience** — offline check-in mode with automatic sync on reconnect.
- **Analytics** — visitor trends, peak-hour planning, security exception reports.

— COMMERCIALS

Licensed per site with volume tiers; deployment, training and integration delivered by Digiware. Available today for pilot and production rollouts.

Ready to move?
